```jsx
import React from 'react'

const ForEach1 = () => {

  const cartItems = [
    { name: "Laptop", price: 60000 },
    { name: "Headphones", price: 25000 },
    { name: "Mouse", price: 1500 },
    { name: "Keyboard", price: 2000 },
  ]

  let total = 0;

  cartItems.forEach((item) => {
    total = total + item.price
  })

  return (
    <div>
      <h2>🛍️ Shopping Cart</h2>
      <ul>
        {cartItems.map((item, index) => (
          <li key={index}>
          <span>{item.name}</span>
          <span>{item.price}</span>
        </li>
        ))}
      </ul>
      <p>{total}</p>
    </div>
  )
}

export default ForEach1
```
